

Instructional Designer/Subject Matter Expert

Overview

Excel Education Systems is seeking experienced instructional designers/subject-matter experts who will be responsible for loading course materials and assessments to the school's LMS. In addition to loading course materials, instructional designers will author additional assessment questions for each course as needed.

Assessment writers will ensure that items are new, unique, original, and aligned to the course learning outcomes. Successful candidates this project will collaborate closely with Excel's Director of Curriculum to ensure development activities reflect a high standard of quality and effectiveness.

Instructional Designers are needed for the Following College-Level Courses

Excel Education Systems is seeking design for the following college level courses:

Accounting	Algebra and Trigonometry	American Government	Anatomy and Physiology
Biology	Business Ethics	College Algebra	Biology
Introduction to Business	Sociology 2e	Introduction Statistics	Prealgebra
Precalculus	Principles of Economics	Principles of Macroeconomics	Principles of Microeconomics
Psychology	U.S. History	American Literature I	English Literature
English Composition I			

Position Requirements

Qualifications for Instructional Designers must have experience teaching at the college level. Instructional Designers must have experience creating online courses and assessments for the particular course(s) they wish to develop. Specific qualifications include:

1. A Ph.D. in a related academic discipline OR an M.S., M.A, or MBA and experience for general education/business faculty;
2. Teaching experience at the college level;
3. Demonstrated experience in assessment design and creation;
4. Commitment to alternative education models;
5. Ability to work independently without daily supervision; and
6. Strong verbal and written communication skills.
Prior experience with remote, contract-based work and knowledge with the Canvas LMS a plus.
